PROFESSIONAL SUMMARY

Computer Science student seeking an oppurtunity to apply my programming and problem solving skills,gain real-world experience while contributing to the organization.

EDUCATIONAL HISTORY

Bachelor of Technology in Computer Science and Data science
CVR College of Engineering,Hyderabad
- Currently pursuing a dgeree with 9.05 CGPA

PROFILES

- LinkedIn-https://www.linkedin.com/in/sahithimadhavaram-6b0048392
- GitHub-https://github.com/Sahithiiiiii
- Leetcode-https://leetcode.com/u/sahithimadhavaram
- HackerRank-https://www.hackerrank.com/profile/sahithi_03
- CodeChef-https://www.codechef.com/users/sahithi371012

TECHNICAL SKILLS

Languages: C, Python, Java, JavaScript, TypeScript, SQL
Frontend: HTML, CSS, React, Tailwind CSS, Vite
Backend: Node.js, Express.js, FastAPI, REST APIs
Databases: PostgreSQL, SQLite
AI/ML: Machine Learning, Regression, Classification, Data Preprocessing, Model Evaluation
Tools: Git, GitHub, Docker
Core Concepts: Data Structures & Algorithms, DBMS, OOP, File Handling

ACHIEVEMENTS

NPTEL Certification-Problem Solving through Programming in C (Score: 58%)

PROJECTS

Project Skills Recommendation

- Built a full-stack platform that recommends suitable career roles, skills, projects, and learning roadmaps based on user interests and existing skills.
- Developed separate frontend and backend components with REST-based communication and structured application workflows.
- Integrated recommendation functionality with a persistent PostgreSQL database and containerized the application using Docker.

Salary Prediction

- Built a machine-learning regression project to predict employee salaries using demographic, education, job-role, and experience features.
- Implemented categorical-data preprocessing, model comparison, cross-validation, and hyperparameter tuning.
- Evaluated models using MAE, RMSE, and R^2 to compare prediction performance.

AI Manual

- Developed an AI-powered application for interacting with technical manuals and obtaining context-aware assistance.
- Built a backend service using TypeScript and Express.js to handle requests and AI-powered processing.
- Added document-processing functionality to work with technical manual content and provide useful responses to users.
